14:20 hrs	Negotiation call	Tower: Kumaraswamy Layout (caller side — moved)	CDR — tower triangulation
16:05 hrs	Victim photograph received	EXIF metadata stripped; under forensic recovery	Digital forensics unit
19:30 hrs	Final instruction call, new number	Tower: Kengeri (caller side)	CDR — tower triangulation
20:10 hrs	Complainant's vehicle movement begins (per family)	Jayanagar → towards Kengeri, per instructions	Family statement + vehicle GPS (personal tracker)
21:05 hrs	Drop-point deviation noted	Instructed point did not match caller's live tower cell	Police surveillance team observation
22:40 hrs	Victim located and recovered	Abandoned outbuilding, Kengeri Satellite Town	Police recovery team

7. AUDIO / DIGITAL EVIDENCE

Evidence	Details
Call Recordings	2 voice calls recorded via complainant's lawful call-recording app, preserved and forwarded to the forensic audio lab for voice-pattern analysis
WhatsApp Screenshots	6 messages (text, voice notes, 1 image) preserved via forensic screen-capture protocol with device hash verification, appended as Annexure-D
Victim Photograph	Digital image received at 16:05 hrs; EXIF metadata found stripped, forwarded for forensic image-recovery analysis
CDR & Tower Data	Requisitioned for numbers +91 7000112233 and +91 7000112244 for the period 17–19 July 2026, cross-referenced against the movement timeline in §6

8. NARRATIVE & INVESTIGATION TIMELINE

The victim, Aditya Shenoy, aged 16, was last seen by a shopkeeper witness, R. Iyer, near the Jayanagar 4th T Block bus stop at approximately 07:50 hrs on 18 July 2026, en route to school. Telecom-provider location data places the victim's phone at a GPS position near Ashoka Pillar, Jayanagar 4th Block, at 08:05 hrs, after which the device went unreachable until the first ransom call was received.

At 11:15 hrs, the complainant, Suresh Shenoy, received a call from an unregistered number, +91 7000112233, in which the caller stated the victim was "safe for now" and demanded a ransom of ₹50,00,000, warning against informing the police. The complainant, in a state of distress, initially attempted to comply with the caller's instructions before contacting Jayanagar Police Station at 15:40 hrs, at which point this FIR was formally registered and a dedicated response team was constituted.

Subsequent communication, summarised in §5, shows a negotiation pattern in which the ransom amount was revised downward to ₹35,00,000 during a call at 14:20 hrs, followed by a photograph of the victim — seated with hands bound, apparently in an indoor location — sent via WhatsApp at 16:05 hrs. This photograph has been forwarded for forensic image-recovery analysis after its EXIF metadata was found to have been deliberately stripped.

Tower-triangulation analysis of the caller-side numbers shows a discernible movement pattern across the day: from a Banashankari-area tower at the time of the first two contacts (11:15 and 12:40 hrs), to Kumaraswamy Layout at 14:20 hrs, and finally to a Kengeri-area tower by 19:30 hrs, when a second, previously unused number (+91 7000112244) issued final drop-location instructions to the complainant. This progressive westward movement was flagged in real time by the investigating team's surveillance unit and informed the decision to position a recovery team in the Kengeri Satellite Town area ahead of the stated deadline.

At 21:05 hrs, the surveillance team noted that the drop-point location communicated to the complainant did not correspond to the caller's live tower cell, indicating a likely diversion tactic. Continuing surveillance of the Kengeri-area cell coverage, combined with a coordinated ground search, led to the location and safe recovery of the victim at 22:40 hrs from an abandoned outbuilding in Kengeri Satellite Town. The victim was found physically unharmed, though in a state of shock, and was reunited with the family the same night; he has since been examined by a government medical officer as a matter of standard protocol.

No arrests had been effected as of the time of victim recovery. Investigation into the identity of the caller(s) behind both numbers, +91 7000112233 and +91 7000112244, is ongoing, with CDR and tower-dump analysis for the surrounding cells in progress. The recorded call audio has been forwarded for forensic voice-pattern analysis, and the outbuilding where the victim was recovered has been sealed pending a full forensic examination for trace evidence.

Investigation Status: Victim safely recovered; case remains active for identification and apprehension of the perpetrator(s). Financial trail (if any ransom partial payment occurred) is being reconciled with the complainant's bank records. This report will be updated via supplementary chargesheet as CDR analysis, forensic voice comparison, and scene forensics are completed.
